PROJECTS

Digital Image Forgery Detection [Major Project]
Dec, 2023 – Mar, 2024
We tried to create a software where it detects tampered image from real image using Deep Learning, where I worked as lead programmer.

Image Steganography Software [Mini Project]
Apr, 2023 – Aug, 2023
Here my group members and I created a Python software which hides messages by encoding them onto a digital image using Cryptography Python library.

INTERNSHIP

Summer Internship Program - Data Science using Python
May,2023
National Small Industries Corporation

WORKSHOPS

Android Application Development Workshop
ARM Cortex-M3 Application Workshop
